

AluTec

Insertion system for framed modules

- Short mounting times
- Heavy-duty design
- Convenient and safe to install

AluTec

Inserting modules – safe and fast

AluTec mounts solar modules in a durable and stable way. The modules are inserted between parallel horizontal rails. There is no need to screw in several clamps. Put it in the top of the rail, let it slide down and the job is done!

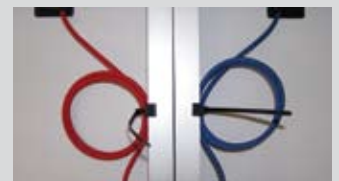

The AluTec mounting system is the result of decades of practice in the field and close cooperation with expert tradesmen. The continuous further development of the system ensures flexibility in its use as well as high quality and load capacity.

On the safe side with AluTec

AluTec is suitable for photovoltaic modules with the most diverse frame heights. Regardless of whether it's for pitched roofs, flat roofs or ground mounting systems, AluTec is the ideal solution for your needs.

- **The load-bearing capacity can be calculated for every frame thickness**
- **Solar modules rest stress-free in the insertion frames**
- **Cross-bracing system evenly distributes the load**
- **Maintenance work is simple and quick**
- **Moveable slot nuts equipped with ball springs ensure effortless mounting**
- **Vertical frames are conveniently fastened from the side**
- **Height-adjustable mounting on roof hooks to compensate for uneven roof surfaces**
- **Aesthetically pleasing, uniform module surface**
- **RAL quality seal marks for certified Creotecc quality**

Mounting steps

Screw roof hook on rafter

Fasten AluVerPlus frame on roof hook

Mount AluTec frame on AluVer-Plus frame

AluTec support rail: ideal for high snow loads

Insert modules and you're done
